

MARQUAN BOWMAN

Charlotte, NC | marquan.bowman.dev@gmail.com | +1-704-246-9155 | [linkedin.com/marquanb](https://www.linkedin.com/in/marquanb)

Professional Summary

Full-Stack Software Engineer & Internal T-Mobile Mobile Expert with 4+ years of experience delivering scalable software solutions for Fortune 500 clients. Proven expertise in developing full-stack applications, microservices, and cloud-based systems. Deeply familiar with T-Mobile's customer ecosystem and network protocols, combining technical consulting excellence with a front-line understanding of user pain points to build high-availability, customer-centric software.

Technical Skills

Angular, React, Python, Tailwind CSS, Git, JavaScript, TypeScript, Nx Monorepo, Unit Testing, Integration Testing, RESTful APIs, GraphQL, gRPC, Microservices

Professional Experience

Bowman Digital Web Development, Charlotte, NC

Owner / Lead Developer | Apr 2026 – Present

- Founded a freelance web development agency specializing in end-to-end digital solutions for small businesses, churches, and content creators.
- Architect and deploy responsive, high-performance web applications using modern frameworks like Angular, React, and Tailwind CSS to enhance clients' online presence.
- Manage full product lifecycles, from initial client discovery and requirements gathering to UI/UX design, development, and cloud deployment.

T-Mobile, Matthews, NC

Mobile Expert | Jan 2026 - Present

- Consult with 50+ weekly new and existing customers to architect personalized mobile and home internet solutions, consistently exceeding targets for Premium Rate Plans (PRP) and P360 protection adoption.
- Act as a frontline technical resource, resolving complex device and network connectivity issues for customers, providing a deep understanding of end-user pain points and system protocols.

CapTech Ventures, Richmond, VA

Software Consultant | Sep 2021 – Aug 2025

Provide software engineering services to Fortune 500 clients across finance and nonprofit sectors. Lead and contribute to backend, frontend, and cloud projects focused on performance, scalability, and user experience.
